Clay Roofing Tiles

THE NAME YOU CAN BUILD ON

A long, beautiful life...
Clay Roofing Tiles

*U*nparalleled beauty - no other roof gives the cool, elegant sophistication of our "S" tile. Whether you are building your dream home or designing a house for someone, the choice of clay tiles is one that gives you flexibility and is a great source of pride.

*T*he use of clay roofing tiles provides a wealth of colour choices and textures which look good on the day they are installed and improve in looks as they weather to produce a warmth and depth of character.

THE NAME YOU CAN BUILD ON

ADVANTAGES

- **Lasts a lifetime**
Since clay is inert, the ABEL clay roofing tile will not burn, decay, rot, rust or deteriorate with time. These roofing tiles do not fade over time as the colour is an integral part of the tile and cannot be "bleached" by the sun or leached away by the rain.
- **Unparalleled beauty**
No other roof gives the cool, elegant sophistication of the "S" clay roofing tile. An ABEL clay roof will enhance your property like no other.
- **Cooler**
ABEL clay roofing tiles provide very good thermal insulation and will therefore keep your house cool and comfortable.
- **Hurricane resistant**
Because each tile is individually fixed and has a small area to weight ratio, an ABEL clay roof is your best choice for resisting hurricane forces.
- **Can be used on any roof design**
The clay roofing system can be adapted to suit any of your requirements for domestic or commercial use.

*T*o customize your roof, consider any of the many installation options the "S" roof tile profile can offer. The elegant design and intrinsic beauty of the "S" tile gives a natural look for the homeowner or architect. It's a stylish medium with lasting protection against most weather conditions.
